

Scientific Calculator product testing: link: https://rbihubcodechallenge.github.io/calculator/index.html TestSuite name: ScientificUICalculator Note: As one TestSuite is Requested, I have planned all the testareas classified into a single testsuite with tagging.	Test Areas	TestCaseID	Description	TestCaseName	Procedure (TestSteps)	Expected Result
	Basic Operations	TC-001	Arithmetic (+ - * /)	Addition Test	Enter 7 + 3 and press =	10
		TC-002	Arithmetic (+ - * /)	Subtraction Test	Enter 7 - 3 and press =	4
		TC-003	Arithmetic (+ - * /)	Multiplication Test	Enter 3 * 6 and press =	18
		TC-004	Arithmetic (+ - * /)	Division Test	Enter 8 / 2 and press =	4
	UI Validation	TC-005	Buttons & UI elements	Digit Buttons	Click every button from 0-9	Correct digit displayed
		TC-006	Buttons & UI elements	Clear Button	Enter any value, then press 'C'	Display resets to 0
		TC-007	Buttons & UI elements	Equals Button	Input an expression and press '='	Result is calculated
	Scientific Functions	TC-008	sin, cos, tan, log, sqrt	Square Root	Enter 16 and press √	4
		TC-009	sin, cos, tan, log, sqrt	Log Function	Enter 100 and press log	2
		TC-010	sin, cos, tan, log, sqrt	Sin Function	Enter 0 and press sin	0
		TC-011	sin, cos, tan, log, sqrt	Cos Function	Enter 0 and press cos	1
		TC-012	sin, cos, tan, log, sqrt	Tan Function	Enter 0 and press tan	0
	Edge Cases	TC-013	Invalid inputs / Zero	Divide by Zero	Enter 7 / 0 and press =	Error / Infinity
		TC-014	Invalid inputs / Zero	Invalid Input	Attempt to enter letters/blanks	Handled gracefully
		TC-015	Invalid inputs / Zero	Decimal Precision	Enter 0.1 + 0.2 and press =	Correct floating result
